RULES

Context

OPEN SITES

The co-operation between Entre-Lacs, Courts-Circuits and Sporen, united as OPEN SITES, originates from a number of fundamental convergences:

- the motivation to base events on local specificities resulting from natural and historic resources: the lakes for Villeneuve d'Ascq, économie for Comines-Warneton and the historic landscapes for Ypres.
- raising the awareness of contemporary art by bringing the public and the artists closer, not in conventional spaces such as museums or art galleries, but in public spaces.
- and, by extension, the work of artists on site, thus leading residents and public, through revisited spaces and questioning, to truly observe and consider their living spaces differently.
- the motivation to support artistic creation by distribution and assistance to visual artists in the creation of installations on site.
- the motivation to bring the populations of the three regions – French, Walloon Belgian and Flemish Belgian – together in a single territory, the Eurométropole.

The rules, the distribution and selection of artists on the basis of the application files are done by the three organisers jointly.

Atelier 2 – arts plastiques in Villeneuve d'Ascq, the Centre culturel MJC of Comines-Warneton and Het CultuurCentrum Het Perron in Ypres are nevertheless three distinctive associations and - besides the close partnership established for the call for projects and the selection of the artists – each association acts completely autonomously and is responsible for the event it organises: the Centre culturel MJC for Courts-Circuits and Atelier 2 – arts plastiques for Entre-Lacs and CultuurCentrum Het Perron for Sporen.

More information on the context of the three events on www.opensites.org

OPEN SITES has the vocation of supporting and valorising on-site creation. Consequently, special attention will be paid to artistic proposals which truly consider the specificities of the lined-up spaces and the proportions they infer.

Courts-Circuits interrogates the area and highlights the local economic shops (short chain) through the artistic creation as a catalyst of local know-how.

Courts-Circuits aims to promote original artworks where materials are processed and sold and where the services offered in Comines Warneton, in the broad sense, are essential. All material exploited by a local trader, linked to Komen's characteristics, forms the basis of the event. The materials can be used as material as such or as the theme of the work.

The completed works can be the result of any area of the visual arts: installation, video, photography, assembly, sculpture, digital art, ...

The works must be realized in Komen, in spaces indicated by the Cultural Center, le SIDECE, l'ADL and their partners. (see details and location on www.opensites.org).

Entre-Lacs has the objective of highlighting original artworks in which water is essential. The aquatic space and the work must be connected. The work can therefore be aquatic, aerial or both, but it has to be non-terrestrial. The event is part of the chain of lakes of Villeneuve d'Ascq (FR). Water as a material and as a symbol: the work must be located in the chain of the Villeneuve lakes (see details and location on www.opensites.org).

Sporen aims to highlight original artistic work around the landscape shaped by Man and Nature. Sporen emphasises the traces of human intervention in the landscape and the way nature has reclaimed the territory. The work may therefore be aquatic, aerial or terrestrial. The artworks will be realised on or around the city walls between the Menin Gate and the Lille Gate. The city walls are the historic witnesses of human intervention in the landscape. Today, they are a green belt around the city of Ypres that nature has partially reclaimed (see details and location on www.opensites.org , www.hetperron.be).

Allocation

8 candidates (or groups) maximum will be allowed to take part in each of the three events.

Entre-Lacs, Courts-Circuits and Sporen work with an identical artistic budget divided in **allowances of € 1,600 per selected and completed project**. The allowance is paid after the event, based on an invoice issued by the artist. The organisers reserve the right either to reduce or to cancel the allowance if the project is not completed. This allowance to support the creation, amounting to € 1,600 (one thousand six hundred euros), is paid to the artist in exchange for one or more of the following elements:

- An invoice with all costs included, drawn up by the artist.
- invoices for materials needed for the creation of the work
- Tickets from place of residence to the place of artistic intervention and back, or equivalent costs.

Also paid by the organisers: accommodation, breakfast and lunch from Monday till Friday

Selection of the candidates

The selection of the candidates allowed to participate is done by a **single selection committee Courts-Circuits | Entre-Lacs | Sporen** based on a file in which the candidate presents the artistic project he plans to develop in the context of the event, as well as references (realisations, course, sketches) that illustrate the expected interest and good completion of the work.

The criteria applied by the selection committee for the examination of the application files are:

- On-site work in dialogue with the history of the site, its current function, its disposition, its physical features, etc.
- On-site work: work at the scale of the site it will be placed in
- Visual and aesthetic features
- Technical feasibility (sketches, dimensions, plan or technical diagram)
- The work matches the theme of the event

- Representatives of the representative visual arts structures of each territory

Specifications

Dates of the residencies and required presence of the artists

Entre-Lacs: The realisation of the work takes place from Monday, June 3th till Friday, June 7th 2024.

Sporen: The realisation of the work takes place from Monday, September 9th till Friday, September 13th 2024.

Courts-Circuits: The realisation of the work takes place from Monday, September 23th till Friday, September 27th 2024.

For the whole duration of the event the public is invited to visit the artists at work and contact is encouraged in particular through the presence of guides/mediators on site.

Artists authorised to participate

8 candidates (or groups) maximum are authorised to participate in each of the three events.

The event is open to any person over the age of 18.

Participation can be individual or as a group

The groups cannot consist of more than three participants. Each group can nevertheless be helped by other unpaid participants not managed by the organisation.

Several projects (maximum 2 per event) can be entered by a single artist or group of artists, either for Entre-Lacs, or for Courts-Circuits, or for Sporen. In that case, a technical specifications form (see annex) must be completed for each entered project.

Durability of the work

After seven days of residency the work stays in place for another 7 days. The organiser, after approval by the artist, can opt to maintain the work in its current state for a longer period.

The restrictions of outdoor work must also be considered with the greatest vigilance:

- Climate and weather restrictions,
- Water restrictions and control of masses/weights/volumes
- Vandalism
- Use of materials adapted for the duration of the event
- Conformity with scales in the outdoor space: the work must really take the space that houses it into account. It is dedicated to it.

Location of the work and materials

For each of those three events, the locations proposed for the work of the artists are described in detail on their websites.

The location of the artist's work on the available sites are subject to a prior agreement between the artists and the organiser who will, if necessary, obtain the necessary authorisations from the public authorities or individuals.

All materials can be used, provided that they are not dangerous, in particular for the pollution of the spaces or to the public and/or local residents.

Prefabricated elements should be accessories in the project; priority must be given to the work on site.

Candidates shall bring any necessary tools for their work themselves. They also need to bring any materials not listed above which are necessary to their work.

- Water and electricity will be available subject to possibilities and demand.
- The supply of plants (via Municipal technical department – Courts-Circuits, Sporen or via ENLM – entre-lacs) can be arranged with the organisers.
- The organisers cannot be held liable for the quality and quantity of those materials.
- The quantities of supplies to be provided to the artist by the organisers must imperatively be negotiated in advance and in writing by the artist and the organiser.
- Any supplies other than the above could be the subject of a special arrangement between the organiser and the artist regarding transport and ordering. This point must be addressed by the artist in the specifications file which is part of his application file.

Clearing of the sites and insurances

The work produced on site will remain the property of the candidates. The later transport of the work is at the expense of the candidates. A work will be considered abandoned if it is not collected by:

- for Entre-Lacs : Monday, July 19th 2024
- for Sporen : Monday, October 8th 2024
- for Courts-Circuits : Tuesday, October 15th 2024

and will in that case be collected or destroyed by the organiser.

Moreover, anything which has not been removed from the site by the artists on the above dates will be removed by the organisers without the latter being held liable for the possible loss or damage of said objects.

The Centre culturel of Comines-Warneton, for Courts-Circuits, Atelier 2 in Villeneuve d'Ascq, for Entre-Lacs and the cultural centre of Ypres, for Sporen, insure the artists against civil liability for the duration of the event. However no insurance will cover the candidates themselves or their work. The organisers cannot be held responsible for injury or damage caused to the candidates, their equipment and/or the subject of their work and/or the work.

Image right - mediation - editing

- The selected candidates accept that photos of their work or themselves may be taken and printed - without generating any rights - in any document relating to Courts-Circuits, Sporen and Entre-Lacs (media, catalogue, invitation, poster, video, ...)
- The website www.opensites.eu provides all useful and detailed information on the context of the 3 events and the spaces provided for the work of the artists.
